Continuation of 3. NOTE: While the proposed amendment overcomes the prior art rejections of the previous office action, the amendment would require further search and consideration. The search and examination was based on the subgenus of formula (I) wherein: X is O; the rings A and B are phenyl; and R1-R6 are as defined in the claims. The subgenus containing other values for X, A and B was held withdrawn from further consideration (as being drawn to nonelected species). The guidelines in MPEP 803.02 provide that 'the prior art search will not be extended unnecessarily to cover all nonelected species'. The claims according to the proposed amendment encompass a genus which includes definitions for X, A and B, that are drawn to a subgenus encompassing nonelected species that was not previously searched. MPEP 803.02 provides that "Amendments submitted after the final rejection further restricting the scope of the claim may be denied entry if they do not comply with the requirements of 37 CFR 1.116". As the proposed amendment will not be entered because it requires more than a cursory review and raises a new search and consideration.
